

# INSPIRING THE NEXT GENERATION OF HEALTHCARE HEROES!

**Student & Parent Policy Packet**

<https://www.littlemedicalschool.com/treasurecoast/>

Welcome to Little Medical School®! We're so excited to have your child join us as they explore the exciting world of healthcare through hands-on, age-appropriate enrichment. To ensure a positive and safe experience for all students, we ask that all families read and acknowledge the following policies outlined in this packet.

## STUDENT EXPECTATIONS

To help foster a respectful, safe, and engaging environment, students are expected to:

- Be kind and respectful to instructors and classmates
- Follow all classroom and program rules
- Take care of materials and equipment provided
- Participate in activities to the best of their ability
- Refrain from behavior that is disruptive, harmful, or disrespectful

## BEHAVIOR POLICY & DISMISSALS

Little Medical School® has a zero-tolerance policy for disrespectful, disruptive, or unsafe behavior. Students may be dismissed from the program for any of the following reasons (without refund of registration fees):

- Aggressive, threatening, or violent behavior
- Repeated disruption of class or refusal to follow instructions
- Use of inappropriate language or gestures
- Damaging Little Medical School® or school property
- Bullying, teasing, or excluding other students
- Behaviors are documented if they go against our policies and will be communicated to the parents of the student by the Program Director.
- Dismissal decisions are made at the discretion of the Program Director and instructors to ensure the safety and well-being of all students.

## PAYMENT POLICY

Registration fees are required to secure a student's spot in the program.

- If you selected weekly payments, these are processed each Friday via Homeroom.
- If a weekly payment fails or is missed, families will receive a 1-week grace period to update their payment method.
- If payment is not received or caught up within 1 week, the student may be temporarily removed from the program until the account is brought current.
- Little Medical School® is unable to guarantee a spot will remain open if repeated payment attempts fail.

## MISSED CLASSES

We understand that absences happen. While we cannot provide makeup classes, students will still receive any take-home items they missed and materials from missed lessons when possible.

## MEDIA & CONFIDENTIALITY REMINDER

- As part of our registration process, families agree to our confidentiality and non-use policy. This agreement exists to protect the copyrighted curriculum and intellectual property developed by Little Medical School®. Our lessons, materials, and teaching methods have been created by board-certified physicians and educators and are proprietary to our brand.
- By registering, you agree that you will not reproduce, share, or distribute any of our program content. This allows us to continue delivering high-quality, innovative educational experiences to students across the world while protecting the integrity of our programs.

## QUESTIONS?

We're here to help! For questions about this policy packet or your child's program, please contact: Melanie Ortega, Program Director, at ✉ [mortega@littlemedicalschool.com](mailto:mortega@littlemedicalschool.com)

## TEACHING WITH FLORIDA'S STATE ACADEMIC STANDARDS FOR SCIENCE IN MIND

Scan to see the state standards we cover

01

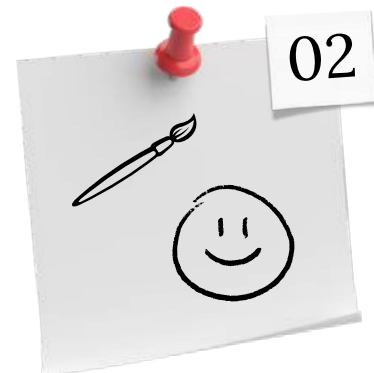

### HEALTH EDUCATION

Identifying healthy behaviors that affect personal health, understanding how to prevent childhood injuries, recognizing there are body parts inside and outside the body, and recognizing ways to prevent common diseases are things we cover in various Little Medical School programs.

### VISUAL ART

We utilize art as a learning form throughout our programs, so kids can use critical thinking, problem solving, and decision making skills when creating craft-based anatomy models in human and animal medicine.

02

03

### SCIENCE

Little Medical School explores many aspects of human, animal, and earth science to teach human body parts (brain, heart, lungs, stomach, muscles, and skeleton) and their basic functions, earth systems and patterns, and more.
