## ***Instructions for completing My Favorite Doctor Thank You Card 2:***

1. You may complete this Thank You card for any lady doctor. It could be your aunt, cousin, friend, mother, or your doctor.
2. Print out the above card and these instructions.
3. In the first empty box on the card, draw a picture of your favorite doctor.
4. For all of the other boxes, read the short sentence starter at the top, then write something special about your favorite doctor in the box.
5. Color/decorate your card. You might want to apply Elmar's glue to the empty spots and sprinkle some glitter over it. Make sure you dump all the extra glitter into a trash can instead of on your floor.
6. Don't forget to sign your name at the bottom of the card.
7. If you wish to frame the card, tape or glue the sheet to a piece of cardboard or thick paper. Then glue little puzzle pieces (or something similar) around the outside of the card. Let dry. Use a glue that dries clear.
8. Please read to younger students: Don't worry if you are not writing yet because you have some other options. (1) Another person may write your comments for you, (2) you may draw pictures in place of your written comments, or (3) you may tell your favorite doctor your comments.
